Password - Your initial password is temporary, and will need to be changed

Change

using the button prior to logon. Passwords must be alphanumeric (contain both letters and numbers), contain a minimum of eight characters including at least one special character and one capital letter. Your password cannot repeat any of the last 10 passwords you have used

If your password is expired or you have forgotten your current password, the 911 Communications Supervisor can reset your password

When your password is reset, remember to **FIRST** go to the

and set a new password. The temporary password that you will be given is only good for this function, and will not allow you to log on.

Status Messaging - This feature will be active via the Harris mobile radios after the new CAD system is deployed. Below is a brief illustration of the status messaging functions in the XG-75M radio.

Location	Verification

- @ Common Place
- / Intersection
 - Street Address
- % Wildcard

STATUS #	ALPHA
1	ENROUTE
2	ARRIVE
3	CLEAR
4	AV QUART
5	SAA
6	SAU
7	INSRVC

- All Harris mobile radios will be capable of status messaging
- This feature replaces the SMU units to which you are accustomed
- 1) Press the STS button to initiate status messaging
- 2) Within 3 seconds choose a status from 1 to 7 on the keypad. If no buttons are pressed within 3 seconds, the radio returns to normal operations
- 3) When a status key is selected, it will display on line one of the radio
- 4) If the wrong status is chosen, simply select the correct one
- 5) Once the desired status is displayed on line one, wait 5 seconds without pushing any buttons and the status will be sent automatically
