Standard Operating Guideline - 98-02 Emergency Response Vehicle and Equipment Inspections

Purpose: This standard is designed to outline minimum guidelines for emergency response vehicle and equipment inspections.

Scope: All fire department personnel.

1. It is the responsibility of the Chief Engineer to ensure weekly vehicle and equipment inspections are completed and documented.
2. Any person discovering a discrepancy with a vehicle or any other fire department equipment will immediately report the problem to the Chief Engineer or the Fire Chief.
3. It is the responsibility of the Chief Engineer to report any discrepancy to the Fire Chief and to have the equipment or vehicle, if deemed unsafe, removed from service immediately and to have it repaired.
