311 Main St.  
Little Creek, DE 19961**

## **Standard Operating Guideline- 98-14 Motor Vehicle Collisions**

**Purpose:** This standard is designed to set guidelines for members who respond to PI 10-10s.

**Scope:** All fire department personnel.

1. All Fire Department personnel will wear full turnout gear when performing rescue and patient care
2. Before an extrication is to begin the following must be completed:
  - A. Vehicle is to be stabilized
  - B. All power to the vehicle is to be disconnected
  - C. All members participating in the extrication need to understand the plan.
3. While using rescue tools or when removing glass, all members will wear fire gloves or rescue gloves and safety glasses or goggles.
4. During patient care, all members will wear at minimum, rubber gloves. Eye protection is recommended.
5. All patients will be secured to a full backboard and collared prior to transport to the hospital, unless told otherwise by ALS or medical control (Another BLS crew cannot).
